

E-GOVERNMENT GEOINFORMATION SYSTEMS FOR LOCAL AND STATE AUTHORITIES

General information

Implementing e-government on local level is a main priority for the Agency for Sustainable Development and Eurointegration (ASDE).

The ASDE activities in this field are in the frame and in support of the overall reform of the Bulgarian public administration.

Based on a proposal of ASDE, on the 30th of April, 2002, was established a working group on e-government on local level, led by the Minister of state administration- Mr. Dimitar Kalchev and in the frame of the Permanent Commission Bulgaria-Bavaria.

A workshop:
PILOT PROJECTS FOR E-GOVERNMENT OF THE SOFIA AND ROUSSE MUNICIPALITIES
was held in Sofia in October, 2003. The workshop was prepared with the support of Bulgarian State administration and with the participation of experts from Siemens Business Services.

On the 16th of December 2002 in Muenchen, a Memorandum for cooperation between Bulgaria and Bavaria in the field of e-government was signed by the Minister of state administration of Bulgaria – Dimitar Kalchev and State minister of Bavaria Erwin Huber.

On the 7th of March the working group on e-government in the frame of the Permanent Commission Bulgaria-Bavaria was approved with an order by the prime-minister of Bulgaria.

Aims

- transfer of good practice and knowledge in e-government;
- support of the National strategy on e-government;
- support of the accession process in administrative reform, transparency of management and transfer of information, anti-corruption measures and strengthening public society;
- digital information data bases;
- integrated and transparent information flow/exchange between different information systems in government, local administration and public services;

- implementing OPEN GIS concept, especially in utilities and territory management;
- remote sensing and geodata management and navigation based on the European network EUPOS;
- elaboration and implementation of pilot projects in public e-services;

Procedure and management

A workshop on e-government is the starting point and a task base for the future collaboration between Bulgaria and Bavaria. The event will take place in Sofia, during the Bavarian Cultural Days, in May, 2003.

Based on its results a package of themes and proposed action will be elaborated and approved in the joint Action Plan.

Responsible for the management of this long term program and process is the joint working group on e-government, in the frame of Permanent Bulgarian-Bavarian Commission. From the Bulgarian side partners are - State administration, working group on e-government on local level, ASDE, Ministry of Finances and governmental structures (related to different priorities –cadastre, registers, etc.), Sofia and Ruse municipalities.

This report shows not a limited project, but a joint process of elaboration and implementation of different activities in e-government. The process is flexible and solution oriented, giving priority on transfer of experience & knowledge and practical measures.

The process is open for other partners and collaborators.

E-GOVERNMENT-WORKSHOP Geoinformation Systems for Local and State Authorities

**Best Practice; Innovative Systems;
Efficient Realisation**

May 22 and 23, 2003 ■ Hotel Sheraton
Sofia

- Electronic utilities register
- Electronic real estate register
- Electronic regional planning register
- Electronic land register
- Digital data transformation
- Geoinformation Systems as competitive edge and as a tool for environmental management and control

More than 60 high level administrators, state experts and municipal representatives are invited.

The e- Government-workshop is organized by the Bavarian State Chancellery with the support of the ASDE and the Working group on eGovernment on local level. The workshop is supported by the Minister of state administration – Mr. Dimitar Kalchev, the mayor of Sofia – Mr. Stefan Sofiansky and the mayor of Ruse – Mrs. Eleonora Nikolova.

Main areas as: cadastre, registers, remote sensing, digital data bases, GIS in utilities, pilot projects on local level.

The first pilot projects to be prepared and started are for the cities of Sofia and Ruse.

Future activities will be discussed and elaborated by the joint Bulgarian-Bavarian e-government working group, in the frame of an Action Plan.

Special attention will be given to investment mechanisms, supporting the – government projects implementation.
